Ambulance emergency: teachers' notes

Introduction

This resource has been produced in two different formats:

- This teachers' pack, including teachers' notes, classroom materials, PowerPoint presentation and audio files to download.
- Self-access resources for learners with online activities. These are available at: <http://esol.britishcouncil.org/uk-life/be-safe-uk>

Overview

This resource **Ambulance emergency** is taken from the **Be safe UK** series of resources which aims to give learners the confidence needed to be able to call for help in the event of an emergency.

There are five units in this series

Unit 1: Call 999 aims to give beginner learners the skills to call the emergency services and give vital basic information in case of an emergency.

Unit 2: Is it an emergency? This unit aims to give learners an overview of each service and what they do. It also teaches learners when they should call 999 and when they should seek alternative help for less urgent incidents.

Unit 3: Police emergency aims to help learners to be able to describe criminal activity and dangerous situations and to seek help from the police.

Unit 4: Fire emergency helps learners describe the nature and location of dangerous fires and also to understand instructions on staying safe when they are waiting for the fire engine to arrive.

Unit 5: Calling for an ambulance teaches learners how to give information when calling for an ambulance. It enables learners to give information about their location and any injuries suffered. It also teaches them to be able to follow first aid instructions given by the call-handler while they are waiting for the ambulance.

Level (Unit 1): This unit has been designed for beginner learners.

Level (Units 2-5): Entry 2/Access 3 in Scotland / CEF A2. The materials are designed to be flexible in terms of differentiation and are accessible to stronger E1 learners.

Ambulance emergency: teachers' notes

Structure, learning hours and delivery context

Ambulance emergency provides a minimum of 4 hours of learning in a classroom context. It is made up of five topics.

Ambulance emergency

- Topic 1: information a call-handler needs
- Topic 2: what happened?
- Topic 3: location
- Topic 4: information about the patient
- Topic 5: following instructions
- Topic 6: Role play

The resource is suitable for whole class use in a number of settings, including voluntary and community ESOL classes. Timings are flexible since teachers can adapt the resource to suit their learners and build in revision as required.

The resource consists of the following components:

In this document:

- Teachers' notes, transcripts and answers
- Flashcards
- Classroom resources (worksheets and cut-up activities)

Available on the ESOL Nexus website:

- Accompanying PowerPoint file – **Ambulance Emergency.ppt** (includes links to video files)
- Flashcards
- Audio files
- Interactive self-access resources

Ambulance Emergency

Time: Approximately 4 hours over a number of sessions.

Aims

- To enable learners to report an ambulance emergency quickly and accurately.
- To enable learners to understand instructions given during a 999 call.

Objectives

All learners will be able to:

- give a short description of what happened in an accident and any injuries.
- give basic details of their location
- give basic details of a patient
- understand key instructions given by 999 call-handlers.

Some learners will be able to

- give a detailed description of their location
- give a detailed description of an emergency.

Ambulance emergency: teachers' notes

Preparation

You will need:

- an interactive whiteboard or data projector to show the accompanying PowerPoint file, videos and interactive activities (see note below). If this is not available, flashcards can be used for most activities.
- to download a copy of the PowerPoint file **Ambulance emergency.ppt**. This file includes links to video resources from YouTube.
- to print a copy of the flashcards to use in class
- to print copies of the worksheets for learners to use in class
- to copy and cut up resources for activities 2c, 4c, 5b, and 6
- to provide learners with glue or blue tack.
- to download the audio files.

Audio files

These can be downloaded from: <http://esol.britishcouncil.org/teaching-be-safe-uk/ambulance-emergency>

A note about interactive whiteboards (IWBs):

Interactive activities are available to support this resource. We have provided links to each individual activity (these activities are also available to learners as self-access items). On some interactive whiteboards (not all), the activities will be fully functional (i.e. you will be able to touch the screen to drag and drop, and so on). Links for interactive whiteboards appear in boxes throughout the resource. As part of your preparation before the session you may wish to bookmark the activities you plan to use.

Background notes for the teacher: ambulance service call-handler procedures

Call-handlers aim to obtain the following information as quickly as possible:

- Your location
- Your phone number
- What has happened
- Some details about the patient

Many callers have poor English. If the caller's language skills are at a low level, they can access an interpreter for a three-way call. However, there may be callers who know a little English, but have difficulty understanding and being understood. These callers may believe their English to be proficient enough and refuse an interpreter and this can lead to frustration. Some may panic and talk too fast to be clearly understood. The activities in this teachers' pack address this situation with activities to familiarise learners with vocabulary and protocol.

The main focus for learners in this unit is 999 calls, and learners should understand that if they are in any doubt as to the severity of the situation they should always call 999. The difference between emergency and non-emergency situations is covered in the unit, 'Is it an emergency?'

Many calls received by the ambulance service are not considered to be emergencies and ambulance services advise contacting alternativeservices in non-life-threatening situations:

- In England call NHS **111** for expert advice. NHS 111 call-handlers can call an ambulance if needed.
In Scotland, callers should call NHS 24 on **08454 242424**.
In Wales, callers should call NHS Direct Wales on **0845 46 47**.
- Travel independently to a local A&E department
- Go to a GP or local NHS walk-in centre
- Go to a local pharmacy.
- Visit the NHS Choices website

Learners should be advised to always call 999 if someone is seriously ill or injured and their life is at risk.

Ambulance emergency: teachers' notes

Introduction

This exercise sets the context with an authentic recording of an emergency call which can be found in the following YouTube clip: <http://youtu.be/bX0beLwjhJM>

Note to teacher: The audio on the film is authentic and higher than entry level 2. Therefore learners probably will not understand everything. However, the questions are set at entry level 2.

The clip is of a call by a six year old boy to the North East Ambulance Service. His pregnant mother has fainted. The image of an ambulance is displayed over the audio.

Put learners into pairs or small groups and give out the **Introduction worksheet**. Play the clip once and ask learners to check their answers with their partners. Play the clip a second time and then carry out group feedback, asking:

- What is the little boy's name?
- Who was the little boy, Liam, calling? (Elicit: 'ambulance')
- Why was Liam calling an ambulance? (Elicit: His mum was sick. Learners probably won't know the word 'fainted').

Ask learners what else they heard in the recording. Write up any suggestions on the board. You may want to play the clip again and elicit further suggestions.

Topic 1: Information a call-handler needs**a) Listen for the questions**

Ask learners to think about what information a call-handler will ask. Elicit suggestions and write them on the board. Ask learners to watch a video and check if their suggestions were similar

Play the video: <http://www.youtube.com/watch?v=RHd08xlwqx0>

The video is from the London Ambulance Service

Ask learners what five bits of information the Ambulance Service needs?

Play the video again, stopping after each bit of information. For example, 'exact location'. Elicit / teach what this means and write on the board. Continue until the five bits of information have been elicited / taught.

The five bits of information needed by the Ambulance Service are:

1. exact location
2. what happened
3. age
4. conscious and awake
5. breathing

Tell learners they are now going to learn how to talk about what happened. The other questions will be dealt with further on in the unit.

Topic 2: What happened?**a) What happened?**

Give out **Worksheet 2a** and display the **Activity 2a slide**. Elicit from learners what they can see in the pictures. Ask learners to predict what accidents could be caused by these items and elicit suggestions. When you have talked about learners' suggestions ask them to listen to the recordings **Emergency A.mp – Emergency I.mp3** and to write the corresponding letter next to the pictures.

Ask learners to compare their answers in groups and then play the recordings again. Feedback by eliciting answers from the class.

If you have access to an interactive whiteboard (IWB) you may want to try an interactive version of this task. Pick learners to ask each question and ask the rest of the class to support.

IWB link: <http://gamedata.bcdev.org.uk/p/MTY2Nzk=>

b) Listen and match parts of the body

Give out **Worksheet 2b** and display the **Activity 2b slide**. Ask learners if they heard any parts of the body mentioned in the previous recording.

Ask learners to listen to the recordings again and to label the diagram on their worksheet according to the letter of the call. You may want to demonstrate by labelling the head (from the first call). Note that calls C, D & E do not mention any parts of the body (can't breathe, choking and loss of conscience), you may wish to omit these for this activity.

Ask learners to compare their answers in small groups or pairs and then play the recordings again. Feedback by eliciting answers from the class. If learners do not know how to say some of the body parts mentioned, practise by drilling pronunciation of this vocabulary.

c) What's the problem? How to describe an injury

Give out the **Activity 2c injury cards**. These cards consist of labelled pictures of different injuries. Ask learners to read the phrase under card 1, 'He's got chest pains'. Ask learners, 'What's the problem?' Elicit: 'He's got chest pains'. Drill for pronunciation. Repeat with all the pictures.

Put learners in small groups or pairs and give out the **Activity 2b incident cards**, ask learners to see if they can remember which incident images correspond to which injury. Play the recordings **Emergency A.mp – Emergency I.mp3** again for learners to check their answers.

Ask learners to compare their answers in small groups or pairs and then play the audio again. Elicit answers from the class and then drill phrases chorally and individually around the class. It is important that learners are able to say the complete phrases rather than individual words.

Reinforce this new lexis by using the **Topic 2c flashcards** or the **Activity 2c slides**, to elicit phrases from learners, drill chorally and individually, ensuring that all learners participate. Make sure learners answer using sentences rather than individual words, for example, 'A dog bit her'. Do not accept, for example, 'bit' on its own.

You could start a discussion by asking if any learners have ever had any of these problems, however this is a topic which could be very sensitive for some learners and it should be treated with care. If learners are comfortable allow time for them to tell their stories.

If you have an IWB in the classroom there is an interactive vocabulary activity which could be used as an alternative way of presenting the vocabulary (using the 'learn' section), or as a learning check at the end of the lesson (using the 'remember' section). Encourage the whole class to support the individual learners answering the questions on the IWB.

IWB link: <http://gamedata.bcdev.org.uk/p/MTY3Nzg=>

d) Speaking about an injury

Stick **activity 2c flashcards** up on the walls around the classroom. Tell learners to work in pairs and walk around the classroom, telling their partners what they see. Monitor learners, assisting with any pronunciation difficulties or vocabulary confusion.

Following this, ask learners to use their **Activity 2c injury cards** and work in pairs. One learner mimes the scenario and the other learner has to say the scenario. Make sure learners take turns in doing this. Monitor and assist.

To consolidate, hold up each flashcard and give the wrong definition of the picture, eliciting the correct definition. For example, hold up the flashcard of the burnt foot and say, 'he's got chest pains?' Ask individual learners, ensuring that each learner has a turn at answering. Encourage peer correction.

If you have access to an IWB, you may wish to try the following interactive activity. Learners have to select the words in the correct order to form sentences for reporting injuries. This activity is against the clock, encourage learners to help each other to complete the task as fast as possible.

IWB link: <http://gamedata.bcdev.org.uk/p/MTY2Nzg=>

Topic 3: Location

Remind learners about the video with Jules from the London Ambulance Service. Elicit the first bit of information in the video that Jules talked about – 'exact location'. If necessary, play the video again:

<http://www.youtube.com/watch?v=RHd08xlwqx0>

Ask learners what 'exact location' means. Elicit: address. Ask what other information a call-handler might ask. Elicit: name and phone number.

a) Name, address and phone number

Tell learners they are going to listen to callers giving their name and address. Give out **Worksheet 3a**. Ask learners to read the addresses out loud.

Play **Address.mp3** and ask learners to tick the correct address on the worksheet.

Elicit feedback and encourage peer correction. Agree on the correct address.

Tell learners they are going to listen again. This time they will write Linda's postcode on the envelope on the second page of **Worksheet 3a** and write down her phone number,

Play audio **Address.mp3** again.

Elicit feedback and encourage peer correction. Agree on the correct postcode and address.

Ask learners if they can say their own address and phone number. Ask for volunteers to say their address and phone numbers out loud to the class.

Ask learners to stand up and mingle, asking each other for their addresses and postcodes. For those learners who do not want to divulge their addresses, write up the learning venue address on the board. These learners can use this. Monitor and assist.

Learners have the opportunity to write their classmates addresses on **Worksheet 3a** but note that teachers should focus on whether learners can say their address accurately. Give feedback on any difficulties noted.

Note to teacher: For more in depth resources on giving addresses, postcodes and phone numbers, please see 'Call 999' teacher notes at: <https://esol.britishcouncil.org/teaching-uk-life/emergency-services>

b) Emergencies in the street

Show **Topic 3b flashcard** or display the **Activity 3b slide** which shows a man lying next to a car with a woman calling on her mobile phone.

Ask learners: Where are they? Are they at home? What's the address?

Elicit that they are not at home - they are outside. Ask learners what they can do if they cannot give an address and write suggestions on the board. Ensure that the suggestions, 'ask someone' and 'landmark' are elicited or taught. Ask learners if they know what a landmark is. Suggest that it can be something like a pub, a church, a school. Elicit landmarks near the learning venue.

Tell learners they are going to listen to some emergency calls where callers are not at home. Give out **Worksheet 3b**. Play **Landmark A.mp3**. Ask learners which picture recording 'A' refers to. Elicit the landmark, 'T Mobile shop' which is picture 6. Ask learners to circle the letter 'A' under picture 6.

Now ask learners to work in pairs to complete the rest of the worksheet. Play **Landmark B.mp3 – Landmark F.mp3**. Stop between each audio segment for learner pairs to discuss and agree on a picture. Monitor and assist.

Conduct whole class feedback, playing the audio again to check on correct answers. Drill the responses chorally and with individuals around the class.

Give out **Topic 2c Map**. The map gives the names of streets and landmarks. Ask learners to look at the questions below the map, 'Where are you?' and 'What are you near?' There are six locations to find on the map. Ask learners to look at number 1 and ask: 'Where are you?' Elicit the answer: 'I'm on King Street near the Primary School', if necessary drill this chorally and individually.

Put learners into pairs and give each pair a dice. Ask learners to roll the dice to choose a location (numbered 1-6) and then practise the questions and answers between them. Remind them to mention street names and local landmarks.

Circulate and monitor pairs, ensure that learners mention landmarks and help as needed. If learners find this task particularly difficult you may wish to drill any problematic location descriptions after this activity.

Topic 4: Information about the patient

a) Listen to questions from a call-handler about the patient

Tell learners that a call-handler can ask questions about the patient. Ask learners to work in pairs and discuss questions that a call-handler could ask. Write up any suggestions on the board.

Tell learners they are going to listen to an emergency call to see if their suggested questions are the same or similar to the ones on the audio. Play **Medical info.mp3**. Elicit questions that the call-handler asked about the patient and write them up on the board. Play the audio again if necessary. Ask learners what the call-handler meant by, 'medical condition'. Elicit: diabetes. Play this section of the audio again if necessary.

b) What's a medical condition?

Show the **Activity 4b slides** or use the **activity 4b flashcards**. The slides and flashcards show a number of medical conditions. Elicit what learners think they are. Encourage mother tongue translation for any assistance in understanding 'medical conditions'. Drill all the words.

Ask learners if they know anyone who has diabetes, asthma, high blood pressure or who is pregnant. Ask if learners know of any other medical conditions. If any learners are willing, ask them to tell the class about a medical condition they have or that a friend or member of the family has.

c) Listen to an emergency call and fill in the gaps

Tell learners they are going to listen to **Medical info.mp3** again and fill in the caller's responses to questions about the patient. Give out **Topic 3c gapfill transcript**. Either cut up the caller's responses or ask learners to cut them up. Ask learners to select the correct response to the call-handler's questions about the patient. They should work in pairs or small groups. Play the audio and then allow learners to discuss their answers. Repeat as many times as necessary.

When the worksheet is complete, conduct whole class feedback and check answers. Give learners some glue so that they can stick the correct answers onto the transcript.

d) Practise giving information about the patient

Give each pair of learners the **Activity 4d mini-script** and **caller's prompts**. Learners should take turns to play the role of the call-handler and the caller. Callers should pick one of the images from the prompt sheet to represent a medical condition and then answer the call-handlers' questions.

Monitor learners for any difficulties with pronunciation or confusion with vocabulary and assist as necessary.

Topic 5: Following instructions

Note to teacher: These teachers notes and the accompanying classroom notes are not first aid advice. Learners should be made aware that they should follow instructions from the ambulance service in an emergency situation. First aid instructions from the British Red Cross can be found at this site: <http://www.redcross.org.uk/What-we-do/First-aid/Everyday-First-Aid>

Ask learners what they think the call-handler might ask them to do while they wait for an ambulance. Write any suggestions on the board.

a) Listening to instructions

Give out **Worksheet 5a**. Tell learners to read aloud the sentences under the pictures. Elicit or teach words that learners do not understand, for example, 'tilt'. You could demonstrate this by putting two fingers under their chin and gently tilting their head back. Do the same with any other words learners do not understand.

Tell learners they are going to listen to an emergency call about a burnt foot. Ask learners to predict which instructions they will hear and write any suggestions on the board. They should just listen on the first recording and ask questions about anything they do not understand. They will then listen a second time and mime the actions.

Play the audio, **Instructions A.mp3**. After the audio has finished, elicit the instructions and discuss any words that learners do not know.

Tell learners they are going to listen for other instructions that a call-handler can ask them to do. Play **Instructions B.mp3**.

Play the first segment of the audio. This gives the instruction to 'put his hand under cold running water' which matches picture 6. Elicit which picture matches the audio. Encourage peer discussion and agreement on the correct picture. Tell learners to circle the letter 'A' next to picture 6.

Now tell learners to work in pairs or small groups and continue with the activity, pausing between each segment of the audio in order to allow learner pairs or groups to discuss and agree upon an answer.

When the activity is completed, elicit answers from the class. Play the audio again and agree on correct answers.

If you have an IWB in the classroom there is an interactive vocabulary activity which could be used as an alternative way of presenting the vocabulary (using the 'learn' section), or as a learning check at the end of the lesson (using the 'remember' section). Encourage the whole class to support the individual learners answering the questions on the IWB.

IWB link: <http://gamedata.bcdev.org.uk/p/MTY3ODA=>

b) Instructions bingo

Cut up the six **Activity 5b bingo cards** and give them to individual learners or pairs. You could use additional copies of the cards if there are more learners in the group.

Tell learners that they have to listen to the instructions and tick them off when they hear them. When they have ticked-off all four instructions on their card they should put their hands up and shout 'bingo!' The first learner/pair to do so is the winner.

Read the instructions from the **Activity 5b bingo caller's card**. You may need to read each instruction several times.

When learners claim to have a complete card, ask them to read back the instructions that they heard to check. You could repeat the activity by giving learners different cards and reading the instructions out in a different order.

c) Simon Says

As an alternative or in addition to the bingo activity above, you might want to practise instruction vocabulary with a 'Simon says' activity. Start by demonstrating a mime for each of the instructions. Then read out instructions with and without saying 'Simon says' beforehand, learners either have to mime the instruction read out or do nothing depending on whether you say 'Simon says' or not. Monitor for any vocabulary confusion.

d) Interactive practice

If you have an IWB in the classroom, you could ask learners to try an interactive vocabulary activity where learners have to identify the instruction in each recording. Encourage the whole class to support individual learners answering questions on the IWB

IWB link: <http://gamedata.bcdev.org.uk/p/MTY3ODE=>

e) Checking instructions

Play **Instructions B.mp3** again, and ask learners to listen to find out how callers made sure that they had understood the instructions correctly. Elicit suggestions. If learners are unable to identify the correct answer, play the caller from the first recording repeating the instructions and ask again. Ask learners why they think it is important to check that they have correctly understood the instructions. Highlight that it is crucial that callers do not do the wrong thing when they are following instructions from the Ambulance Service.

Drill the repeated instructions and questions from the recording, modelling the intonation.

Ask learners to work in pairs giving and checking instructions, suggest that they use **Worksheet 5a** as a prompt. Monitor and check that all learners understand how to check instructions with repetition.

Topic 6: Role-plays

Tell learners they are going to practise making an emergency call. Divide learners into pairs and give each pair a set of role-play cards and a call-handler script.

The script has the questions which the 'call-handler' should ask their partner. The callers' cards have prompts using images from the earlier parts of this unit. Callers should pick these up at random and use these to help them answer the questions.

Display the example slide and demonstrate this role play with a confident learner taking the role of the call-handler. Encourage the class to suggest responses before giving your own, make sure that you check the instructions with the call-handler and elicit from learners ways to check instructions.

Ask learners to carry out the role-plays in their pairs. Circulate and monitor, helping students with vocabulary, pronunciation and noting any difficulties that they have. More confident learners could try to make up further scenarios, not on the cards.

If you have access to an interactive whiteboard, you could ask learners to complete an exercise matching questions and answers from an emergency call as a learning check. Encourage the whole class to support individual learners answering questions on the IWB

IWB link: <http://gamedata.bcdev.org.uk/p/MTY3Nzk=>

Extension Activity:

To do further work on the language of first aid instructions, you may want to show learners videos from the British Red Cross' Everyday First Aid section, which you can find at:

<http://www.redcross.org.uk/What-we-do/First-aid/Everyday-First-Aid>

This features videos showing what to do to help people in a number of emergency situations as well as clear written instructions.

Topic 2 transcripts**Emergency A.mp3**

Caller: My friend has hit her head. Her head's bleeding.

Call-handler: What happened?

Caller: I was driving. She's in the passenger seat. Something hit us and she hit her head on the side window.

Emergency B.mp3

Call-handler: OK. Help is on its way. What's the problem?

Caller: It's my dad! He's got really bad chest pains! I think he's having a heart attack! Please, please hurry!

Call-handler: OK. Please keep calm. Help is on its way. I'm going to ask you some questions, OK?

Caller: OK.

Call-handler: How old is your dad?

Caller: 72.

Call-handler: Is he breathing?

Caller: Yes, but... with difficulty

Call-handler: Is he conscious?

Caller: Yes, well... just about.

Call-handler: What happened?

Caller: He didn't want to have any lunch. He said he felt sick. That was about two hours ago. And then, he started having pains in his chest. Now, they're really bad.

Call-handler: Are you near him?

Caller: Yes, I'm next to him.

Call-handler: Tell him the ambulance is nearly there. It's just around the corner.

Emergency C.mp3

Call-handler: OK. An ambulance is on its way. What's the problem?

Caller: It's my colleague. He can't breathe.

Call-handler: What happened?

Caller: He said he felt too hot and then he started to get short of breath...

Emergency D.mp3

Caller: My uncle is choking! He's all red in the face. Please hurry!

Call-handler: An ambulance is on its way. Stay on the line please and I'm going to try to help you. How old is he?

Caller: He's 53.

Call-handler: What happened?

Caller: He was eating a biscuit. I think it got stuck. Oh, God! What can I do?

Emergency E.mp3

Call-handler: OK. What's the problem?

Caller: It's the builder. He's unconscious.

Call-handler: What happened?

Caller: I don't know. He was fixing our window. I heard something fall. I came outside and he was lying there.

Call-handler: Was he on a ladder?

Caller: Yes.

Emergency F.mp3

Caller: My friend... she's pregnant... a dog bit her!

Call-handler: OK. What happened?

Caller: The dog wasn't on a lead! It just ran to my friend and bit her on the arm! It's really bleeding.

Call-handler: Is the dog still there?

Emergency G.mp3

- Caller:** It's my husband! He's cut his finger off! Please hurry!
- Call-handler:** OK. Please keep calm. How old is your husband?
- Caller:** 38.
- Call-handler:** Is he conscious?
- Caller:** Yes, but he's gone really white. I think he's going to faint.
- Call-handler:** Is he standing up?
- Caller:** Yes.
- Call-handler:** Tell him to sit down. An ambulance is on its way.
- Caller:** Sit down, John. An ambulance is on its way.
- Call-handler:** What happened?
- Caller:** He was cutting some wood... with a saw... an electric saw. I hear a scream and came running out here. There's a lot of blood. What can I do?

Emergency H.mp3

- Caller:** It's my sister! She's burnt her foot.
- Call-handler:** OK. What happened?
- Caller:** Please hurry. She's in terrible pain.
- Call-handler:** An ambulance is on its way now. What happened?
- Caller:** She was making a cup of tea... She dropped the kettle on her foot. The boiling water went all over her foot. I don't know what to do.

Emergency I.mp3

- Caller:** A woman... I think she's broken her leg! I heard a horrible snapping sound.
- Call-handler:** What happened?
- Caller:** She fell off her bike.
- Call-handler:** What's she doing now?

Topic 3 transcripts**Address.mp3**

Call-handler: Hello, ambulance service, what's your name, address and the number you're calling from, please?

Caller: Flat 8a, Mill House Lane, London N17 4WF. My number is 072596 25487.

Landmark A.mp3

Caller: I don't know what the road is called, it's in the shopping precinct outside T-Mobile

Landmark B.mp3

Caller: We're on Green Street, near the postbox.

Landmark C.mp3

Caller: We're on the M1, there's a London Leeds 47 sign ahead

Landmark D.mp3

Caller: We're in Oxford Street, outside John Lewis

Landmark E.mp3

Caller: I'm in King Street, by the bus stop.

Landmark F.mp3

Caller: We're outside the Bella Italia restaurant on Wood Road.

Topic 4 transcript**Medical info.mp3**

Call-handler: Hello, which service do you need?

Caller: I need an ambulance, quick!

Call-handler: What's the problem?

Caller: It's my father. He's unconscious. Maybe it's a heart attack.

Call-handler: Is he breathing?

Caller: Yes, he is but very little

Call-handler: OK. I need to ask you some questions. What's your address?

Caller: 24 Park Street. You turn right from the High Street and it's on the left. Please hurry!

Call-handler: Please stay calm. The ambulance is coming. Please listen carefully. Tell me what happened.

Caller: We were watching TV. My dad had chest pains. Then he fell on the floor.

Call-handler: Does he have a medical condition?

Caller: Yes. He's diabetic.

Call-handler: Is he on his back?

Caller: Yes he is.

Call-handler: Good. Don't move him. Where are you in the house?

Caller: We're in the living room. It's at the front of the house.

Call-handler: How old are you?

Caller: I'm 14.

Call-handler: How old is your dad?

Caller: He's 46. Please hurry!

Call-handler: You're doing very well. The ambulance is very near

Caller: I can hear it now. Thank you!

Call-handler: Good. Well done. Good bye.

Topic 5 transcripts**Instructions A.mp3**

Call handler: What's the problem?

Caller: It's my sister; she's burnt her foot,

Call handler: Ok, what happened?

Caller: She was making a cup of tea, she dropped the kettle on her foot, and the boiling water went all over her foot. I don't know what to do.

Call handler: What's she doing now?

Caller: She's holding her foot, she's in real pain.

Call handler: Tell her an ambulance is on its way

Caller: *(to sister)* An ambulance is on its way

Call handler: Are you in the kitchen?

Caller: Yes, we're in the kitchen, she's on the floor and I'm sitting next to her

Call handler: OK, you need to cool the burn, put some towels or some kitchen roll on the floor...,

Caller: OK

Call handler: ...turn on the cold tap, and get something to put the water into, then pour the water over your sisters' foot.

Caller: Ok, I've got a jug

Call handler: Get some more water and pour it over your sisters' foot. Do this for 10 minutes, do it until the ambulance arrives.

Ambulance emergency: transcripts

Instructions B.mp3**A**

Caller: It's my son, he's burnt his hand
Call handler: Put his hand under cold running water
Caller: Put his hand in water?
Call handler: No, put his hand under cold, running water.
Caller: Oh, put his hand under cold, running water?
Call handler: Yes

B

Caller: It's my auntie, she's fallen, and I think she's broken her neck.
Call handler: Is she lying on her back?
Caller: Yes, can I move her?
Call handler: No, Don't move her
Caller: I can't move her?
Call handler: No, don't move her,
Caller: OK, I won't move her.

C

Caller: It's my uncle, I don't know what to do, he's choking
Call handler: Firmly hit him on the back
Caller: Hit him on the back?
Call handler: Yes, hit him on the back firmly,
Caller: Firmly hit him on the back?,
Call handler: Yes,

D

Caller: It's my sister; she's cut her arm, there's blood everywhere.
Call handler: Put pressure on the wound,
Caller: Sorry, can you repeat that?
Call handler: Yes, put pressure on the wound,
Caller: OK, put pressure on the wound

Ambulance emergency: transcripts

E

Caller: It's my husband, I can't wake him up, I think he's unconscious

Call handler: Is he breathing?

Caller: I don't know,

Call handler: Gently tilt his head back

Caller: Pull his head back?

Call handler: No, tilt his head back, gently

Caller: Tilt his head back and it's got to be gentle?

Call handler: Yes, tilt his head back gently

F

Caller: It's my mother, she's unconscious.

Call handler: Is she breathing?

Caller: Yes

Call handler: Move her on to her side

Caller: Did you say move her on to her side?

Call handler: Yes, move her on to her side

Where are you?

What are you near?

Worksheet 4c

Call-handler	Hello, which service do you need?
Caller	I need an ambulance, quick!
Call-handler	What's the problem?
Caller	It's my father. He's unconscious. Maybe it's a heart attack.
Call-handler	Is he breathing?
Caller	
Call-handler	OK. I need to ask you some questions. What's your address?
Caller	24 Park Street. You turn right from the High Street and it's on the left. Please
Call-handler	Please stay calm. The ambulance is coming. Please listen carefully. Tell me
Caller	We were watching TV. My dad had chest pains. Then he fell on the floor.
Call-handler	Does he have a medical condition?
Caller	
Call-handler	Is he on his back?
Caller	
Call-handler	Good. Don't move him. Where are you in the house?
Caller	We're in the living room. It's at the front of the house.
Call-handler	How old are you?
Caller	I'm 14.
Call-handler	How old is your dad?
Caller	
Call-handler	You're doing very well. The ambulance is very near
Caller	I can hear it now. Thank you!
Call-handler	Good. Well done. Good bye.
