Read this information about driving in the U.K.

When you *drive* a car in the UK you must:

- have a valid driving licence
- be insured to drive the car.

Full Licence

Provisional Licence

A *full* driving licence shows that you have passed a driving test and you know how to drive. A *provisional* driving licence means that you are learning to drive and you must have someone in the car with you who can teach you to drive.

You must also be insured to drive a car. You must buy car insurance for yourself or you must make sure that the owner of the car you are driving has insurance for you. This means that if you have an accident the insurance company usually pays for the damage to the other person's car.

When you *own* a car in the U.K. every year you must:

- pay for road tax and display a tax disc in your car
- get an M.O.T test and have an MOT certificate (If your car is 3 years or older).

Every year you must pay tax to drive your car on the road. You must put a tax disc in the window of your car to show that you have paid this tax. The government uses the money from road tax to build and repair the roads.

When a car is 3 years old it must have its first MOT test. The car must then have an MOT test every year. This test checks that the car is safe to drive and that it doesn't damage the environment.
